LOCAL EXCHANGE TARIFF

1.1 DESCRIPTIVE SUMMARY

The basic rate element for the local exchange service offered in this tariff is the exchange access line. The exchange access line is composed of the serving central office line equipment, all outside plant facilities needed to connect the serving central office with the customer premises, and the network interface. These facilities are Telephone Company-provided and maintained and provide access to and from the telecommunications network for long-distance service and for local calling. The local calling option is selected by the customer as set forth in this tariff. The long-distance service option is selected by the customer as set forth in the Access Service Tariff and the Long Distance Message Telecommunications Service Tariff.

1.2 GENERAL

1.2.1 This tariff applies to local exchange telephone services furnished or made available by the Southwestern Bell Telephone Company in the state of Kansas and is governed by the General Exchange Tariff, which are hereby made a part of this tariff. Unless otherwise specified, the charges quoted are for periods of one month, are payable monthly in advance, and entitle the customer to exchange telephone service as described in this tariff.

1.2.2 The local exchange rates shown in this tariff are applied in accordance with the provisions of this tariff for services located within each exchange. The base rate area, isolated base rate area, exchange area, zone area and theoretical exchange and base rate area maps for each exchange are hereby made part of this tariff.

1.3 APPLICATION OF RATES

- (CP) 1.3.1 Exchange rates found in paragraphs 1.7.1, 1.7.2, and 1.7.3 will not increase beyond

LOCAL EXCHANGE TARIFF

1.3 APPLICATION OF RATES (Continued)

(MT) 1.3.8 Classification of Exchanges

Rates for local exchange service are based on the number of exchange access arrangements within the primary service area of an exchange or zone. Where extended area service is provided which involves exchanges or zones of Southwestern Bell Telephone Company and another telephone company, the total exchange access arrangements of all exchanges or zones involved are used to determine the basis for grouping. Rates for the various Rate Groups are shown in paragraphs 1.7.1 and 1.7.2 of this tariff.

When the number of exchange access arrangements in the primary service area of an exchange or zone increase or decrease to such an extent that the exchange or zone should be in a different Rate Group and after such exchange or zone has maintained consistently for a minimum of twelve (12) months a number of exchange access arrangements which is either above or below the range of its Rate Group, the Kansas Corporation Commission shall be informed and amended tariffs filed for such exchange or zone for the purpose of moving such exchange or zone to a higher or lower Rate Group; furthermore, in those instances when the number of exchange access arrangements has remained above or below the range by two (2) per cent for six (6) months or more for an exchange or zone, such exchange or zone may be changed to a higher or lower Rate Group by informing the Kansas Corporation Commission and filing amended tariffs.

Following are the rate groupings by Exchange Access Arrangements:

<u>Group</u>	<u>EAA's</u>	<u>Group</u>	<u>EAA's</u>
1	0-499	5	16,000-99,999
